

Product Code . ILS-PLE-10136

Resistance Box Decade Dial Type

Description

Resistance Box Decade Dial Type

Each dial has 10 resistances, with a knob at the top which rotates with positive click stop to select the desired value as indicated alongside index mark on the knob. Comprises circular dials mounted underneath a metal cover plate, inside sturdy aluminium extrusion case. Provided with a pair of 4mm sockets for connecting the resistances across a circuit and a yellow socket for earthing. Multiple dials are connected in series to add to the total resistances of each dial.

Four Decades:-

0-10 ? $\times 1$?

0-100 ? $\times 10$?

0-1000 ? $\times 100$?

0-10 k? $\times 1$ k?

Total resistance is 11, 110 ? (or 11.11 k?)

Specifications:-

Accuracy $\pm 5\%$.
