

Product Code . ILS-PLE-10137

Post Office Box-Plug Type (Constantan and Manganin Coil)

Description

Post Office Box-Plug Type (Constantan and Manganin Coil)

The 4-Ratio Post Office Box has sixteen coils as above and two proportional arms each with coils of 1, 10, 100, 1000, ohms.

Also incorporates infinity gap.

Two spring keys having good contact for battery and galvanometer is also provided.

Resistance between 0.1 and 1111000 ohms can be accurately measured using a DC battery.

The 3-Ratio Post Office Box has sixteen non-inductively wound coils 1, 2, 2, 5, 10, 20, 20, 50, 100, 200, 200, 500, 1000, 2000, 2000, 5000 ohms and two proportional arms each with coils of 10, 100, 1000, ohms.

The whole system is contained in a superior quality wood box.

Available in 3-Ratio and 4-Ratio.

Post Office Box 3-Ratio and 4-Ratio (Manganin coil) consists of 12mm & 14mm thick rectangular brass block and have accuracy $\pm 0.05\%$.

Post Office Box 3-Ratio and 4-Ratio (Constantan coil) consists of 12mm & 14mm thick rectangular brass block and have accuracy $\pm 0.1\%$.
