

Product Code . ILS-PLE-10175

Ballistic Galvanometer

Description

Ballistic Galvanometer

Leveling screws for balancing the coil.

Coil with mirror suspended between the long suspension at the upper end and a spring at the lower end. Suspension and spring are made of special alloy to provide high degree of sensitivity to the movement.

Movement housed in a bakelite case.

This galvanometer has been designed for very low current measurement.

Resistance	100 ?	500 ?
Charge Sensitivity	300mm/ μ C	600mm/ μ C
Current Sensitivity	1000mm/ μ A	1400mm/ μ A
Critical Damping Resistance	2000 ?	3500 ?
Time Period	12sec	12sec
