

**Product Code . ILS-PLE-10196**

## Electric Fields Apparatus

### Description

---

#### Electric Fields Apparatus

The apparatus comprises a clear plastic dish 90 x 12mm diameter x depth, and base 140 x 125mm.

The apparatus enables electric field patterns to be shown in much the same way that magnetic fields are demonstrated with iron fillings, either by direct viewing or on an overhead projector.

Along side each terminal is a thumbscrew system which permits fine height adjustment of the electrodes.

For use with 0-5kV EHT power supply.
