

Product Code . ILS-PLE-10213

Calorimeter Set

Description

Calorimeter Set

Inner vessel has three legs supported on rubber stoppers, which thermally insulates its base from the outer vessel.

Indian Lab Suppliers with the smaller vessel placed inside the bigger one, the air gap between their respective walls provides insulation to minimize heat loss.

A complete set in copper comprising of inner copper vessel of size 75 × 50mm (height × diameter) and one outer copper vessel of size 100×75mm (height × diameter).

A copper lid for the outer vessel has a small tubule at the center for mounting thermometer through holed stopper and slit for stirrer.

Supplied complete with stirrer but without thermometer.
