## Newton's Disc Card

### Description

---

#### Newton's Disc Card

Made of sturdy paper.

Contains the colors of the spectrum.

The Newton's disc is a sturdy, vibrantly colored tool that can be utilized to demonstrate Newton's theory that white light is comprised of a spectrum of colors.

Recommended for use with a Newton's disc spinning apparatus (such as the hand-driven Newton's disc or the economy Newton's disc).

The disc, printed with the colors of the spectrum, appears to become a neutral whitish color when spun quickly, demonstrating that white light is actually comprised of colors.

One card.

7 inch diameter.

When spun quickly, the colors appear to fade into a neutral whitish color.
