

Product Code . ILS-BLE-10351

Respirometer

Description

Respirometer

The apparatus comprises two stoppered glass boiling tubes connected by three way taps to either limbs of U-shaped graduated manometer.

CO₂ given off by the respiring organisms is absorbed by potassium hydroxide in the experimental chamber resulting in a change in the level of liquid in the manometer tube.

One tube holds the organisms and has a syringe for altering the level of liquid in the manometer during setting up.

The other tube acts as a control thermo-barometer.

Supplied complete with wire basket for supporting organisms and 1 mL syringe.

For comparing rates of absorption or evolution of gases by small organisms during respiration.
