

Product Code . ILS-BLE-10361

Desiccator

Description

Desiccator

The dome, molded in rigid and transparent polycarbonate, gives a clear view of the desiccant placed inside.

The knob on the top provides easy handling of the dome. The lower part is made of polypropylene.

Indian Lab suppliers is leading these vacuum desiccators have a polypropylene bottom and polycarbonate top.

These autoclavable vacuum desiccators can hold vacuum up to 740mmHg for 24hrs without greasing.

An internal groove is provided on the flange to hold a silicon rubber O-Ring.

The polypropylene stopcock is fitted with a self lubricating PTFE plug.
