DNA Activity Model

Description

DNA Activity Model

Affordable, easy-to-understand, realistic replica of the molecule of life.

Your students will construct their own double helix model complete with cytosine, adenine, guanine and thymine nucleic acid bases, connecting phosphate strands, and a centre rod representing hydrogen bonds.

Colour-coded parts feature specially shaped ends to ensure proper base pair alignment and can be unzipped to demonstrate DNA replication.

Easy to assemble, this three-dimensional model is made of durable plastic components for years of classroom use.

Features sturdy, metal base for easy rotation and classroom display.
