

Product Code . ILS-EELE-10395

Inductive Load Banks

Description

Inductive Load Banks

It works on variation of air gap principle. Voltage and ammeter are used to find the voltage and current at variable loads. Copper conductor connected with 3PH choke coil star. High grade silicon used with stamping. For the high insulation strength, wound coils are impregnated in vacuum pressure. Works on principle of air gap variation. Fitted in trolley with MS box coated with powder.

We are leading manufacturers, suppliers of Inductive Load Banks for Electronics Engineering Lab Equipments. Contact us to get high quality Inductive Load Banks for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.

Contact jLab for your Educational School Science Lab Equipments. We are best maths lab equipments manufacturers, maths lab kit india, maths lab kit suppliers, maths lab kits manufacturers, metal testing equipments, physics lab educational equipments in india.
