

Product Code . ILS-EELE-10399

Synchronous Motor With Exciter

Description

Synchronous Motor With Exciter

Electrical loading: D.C Generator fitted with motor and exciter on similar channel basis. Type of self Synchronizing. For the high insulation strength, field windings and armature are impregnated in vacuum pressure. For mechanical loading ratings: 415V, 1500RPM, 2H.P to 5H.P directly coupled with exciter.

Mechanical loadings: loading arrangements by the help of pulley of the synch motors with exciters. Stamping of armature with high grade silicon. Poles shoes offered in deepener windings.

For trouble free and longer life operations large size of bearings are used. Dynamic balanced slanted rotor used for the low noise. Brush holders in constant/uniform pressure. Terminal box is properly engraved with all terminals. Excellent quality carbon bushes are used in rings of gun metal slips.

We are leading manufacturers, suppliers of Synchronous Motor With Exciter for Electronics Engineering Lab Equipments. Contact us to get high quality Synchronous Motor With Exciter for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.

Contact jLab for your Educational School Science Lab Equipments. We are best physics lab

equipment supplier, physics lab equipment suppliers in ambala, physics lab equipments manufacturers, physics lab equipments suppliers, physics labware, school educational equipments in india.
