

Product Code . ILS-EELE-10400

Slip Ring Induction Motor

Description

Slip Ring Induction Motor

These motors are appreciated for their noise less performance, low maintenance, easy to handle, compact designs, and other features widely. Both rotor and stator are wound with high quality copper conductor. These types of motors are almost same as normal induction motors. For trouble free and longer life operations large size of bearings are used. In order to have the exact machine readings, the strong base frame with perfect dial type spring and durable performance bolts are used. ISS standards slip rings induction motors. Ratings: For 3ph, 415Volts, 50Hz., 2H.P to 7.5HP. Dynamic balanced slanted rotor used for the low noise.

Starting methods: starter resistance to Rotor with protection of lower load and no volt. Field windings and armatures are impregnated with vacuum pressure for the best insulation strength. Brake drum and rotor pulley are perfectly balanced. Proper fittings of all terminals on terminal box. Rings of gun metal slip are used with superior quality carbon bushes.

We are leading manufacturers, suppliers of Slip Ring Induction Motor for Electronics Engineering Lab Equipments. Contact us to get high quality Slip Ring Induction Motor for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.

Contact jLab for your Educational School Science Lab Equipments. We are best high school maths lab kit manufacturers, high school physics lab equipment, high school science kits exporters, high school science lab equipment, high school science lab equipment manufacturers, high, school

science lab equipments suppliers in india.
