

Product Code . ILS-EELE-10412

Power Electronics Training System

Description

Power Electronics Training System

It includes single-phase rectifiers, three-phase rectifiers, DC choppers, inverters and application experiments. It has wide the applications of solid-state electronics to the control and conversion of electric power. Popular circuits of power electronics contain rectifiers, choppers and inverters. The Power Electronics Training System consists of 28 experimental modules, a three-phase squirrel cage motor, load, control and measuring devices. This is the combination of power, electronics, and control. The experimental modules include converter, power supply, load, control and testing modules. These experimental modules and instruments will be introduced and demonstrated in the subsequent experiments.

We are leading manufacturers, suppliers of Power Electronics Training System Electronics Engineering Lab Equipments. Contact us to get high quality Power Electronics Training System for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.

Contact jLab for your Educational School Science Lab Equipments. We are best school lab equipment supplier, school lab equipments, school lab equipments export, school lab equipments exporter, school lab equipments manufacturers, school lab equipments manufacturers in india

Indian Lab Suppliers,
