

Product Code . ILS-EELE-10436

Fuel Cell Technology Trainer

Description

Fuel Cell Technology Trainer

Fuel cells are the most promising alternate energy supply and are already being used in a number of areas, including automotive engineering and power generation systems. The Fuel Cell Technology Trainer allows the student to create a grid-independent power supply that uses only hydrogen as its fuel. A switch located on the panel allows for switching between the fuel cell and an external source. The can also be connected to an external energy source, such as a solar panel or wind generator, for comparison between the different technologies. The system familiarizes the student with fuel cell power supply technology, an environmentally friendly method of generating power directly from a hydrogen reaction.

We are leading manufacturers, suppliers of Fuel Cell Technology Trainer for Electronics Engineering Lab Equipments. Contact us to get high quality Fuel Cell Technology Trainer for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.

Contact jLab for your Educational School Science Lab Equipments. We are best physics lab equipment supplier, physics lab equipment suppliers in ambala, physics lab equipments manufacturers, physics lab equipments suppliers, physics labware, school educational equipments in india

Indian Lab Suppliers,
