

Product Code . ILS-EELE-10438

Educational Hydroelectric Micro Station

Description

Educational Hydroelectric Micro Station

A turbine equipped with a Turgo wheel consisting of 20 buckets and two injection pipes with manual regulation of the needle openings. This makes it possible to highlight aspects of the turbine's performance in accordance with changes to the output of the forced pipe and configuration of the injection pipes. On the upper side of the turbine there is a LEROY SOMER three-phase asynchronous generator. The whole operational part is mounted on a frame equipped with industrial casters. A porthole window enables observation of the different hydraulic phenomena. A multi-cellular centrifugal pump. A pipework assembly, flowmeter and pressure sensor enable simulation of the waterfall in the form of a forced pipe. These are essential as they enable modification of the output of each pipe and selection of the use of one or two pipes.

We are leading manufacturers, suppliers of Educational Hydroelectric Micro Station for Electronics Engineering Lab Equipments. Contact us to get high quality Educational Hydroelectric Micro Station for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.

Contact jLab for your Educational School Science Lab Equipments. We are best school educational lab equipments manufacturers, school lab equipment export, school lab equipment exporter, school

lab equipment manufacturer, school lab equipment manufacturers, school lab equipment manufacturers in india.
