

**Product Code . ILS-ELE-10572**

## PIC16F Training Lab

### Description

---

#### PIC16F Training Lab

This controller contains most of the powerful functions in modern MCUs nowadays. Moreover, it can be used for automation, motor control, device measurement, and mechanical controls...etc. PIC16F Training Lab which uses Microchip's PIC16F887 is a 8-bit microcontroller to implement various I/O control experiments. PIC16F is popular and well-known due to its economic cost, wide applicability, high accessibility and reliable stability. Together with our user friendly experiment manual, end users can learn the control of PIC MCU more conveniently and efficiently .

PIC16F is popular and well-known due to its economic cost, wide applicability, high accessibility and reliable stability. The integration of these devices enable end users to create and implement different kind of control experiments. Contains several peripheral devices from basic LED to advanced capacitive sensing module.

Contact jLab for your Educational School Science Lab Equipments. We are best school lab equipment supplier, school lab equipments, school lab equipments export, school lab equipments exporter, school lab equipments manufacturers, school lab equipments manufacturers in india in india
