## Advanced FPGA Development System Trainer

### Description

---

#### Advanced FPGA Development System Trainer

This training system consists of FPGA chip with higher logic elements and large number of pins. Therefore, students are able to develop, implement and verify design of basic or advanced digital circuit, digital signal processor and CPU/MCU.

This system is equipped with ADC/DAC analog module, keyboard, LCD display, PS2, VGA, UART, SCI interface, LEDs, 8-digit 7-segment displays, DC motor and stepper motor which allow students to handle complex mixed signal design and digital control design.

#### Features:-

- It provides AD/DA converter, keypad, LCD display, PS/2, VGA, UART, SCI interface, LEDS, 8-digit 7-segment LED display, step motor and DC motor driver circuits.
- Suitable for the curriculum training in electronics, electrical engineering, information, communication and automation field.
- Develop and verify basic and advanced digital circuit, digital signal processing and

---

CPU / MCU with large-element and multi-pin FPGA chip.

- Ideal for professional IC designers, R&D engineers, undergraduate and graduate students to learn IC design and software development.

Contact jLab for your Educational School Science Lab Equipments. We are best school lab equipment supplier, school lab equipments, school lab equipments export, school lab equipments exporter, school lab equipments manufacturers, school lab equipments manufacturers in india
