

Product Code . ILS-EAE-10792

Resistance Substitution Box

Description

The Resistance Substitution Box is a convenient instrument in determining the desired resistance values in circuits under design or test.

The values are from 10 to 1000k (1 meg) in 24 steps. All resistors are 5% tolerance 1/2 watt.

The values selected for your resistance substitution box were determined to be the most commonly used in modern solid-state circuits.
