

Product Code . ILS-EAE-10794

Post Office Box Plug Type

Description

Two spring keys having good contact for battery and galvanometer is also provided.

The whole system is contained in a superior quality wood box.

The 3-Ratio P.O. Box has sixteen non-inductively wound coils 1, 2, 2, 5, 10, 20, 20, 50, 100, 200, 200, 500, 1000, 2000, 2000, 5000 ohms and two proportional arms each with coils of 10, 100, 1000, ohms.

The 4-Ratio P.O. Box has sixteen coils as above and two proportional arms each with coils of 1, 10, 100, 1000, ohms.

Resistance between 0.1 and 1111000 ohms can be accurately measured using a DC battery.

Also incorporates infinity gap.

Available in 3-Ratio and 4-Ratio.

P.O.Box 3-Ratio and 4-Ratio (Manganin coil) consists of 12mm & 14mm thick rectangular brass block and have accuracy $\pm 0.05\%$.

P.O.Box 3-Ratio and 4-Ratio (Constantan coil) consists of 12mm & 14mm thick rectangular brass block and have accuracy $\pm 0.1\%$.
