

Product Code . ILS-POM-10863

Metal Cylinder

Description

Set of six different elements in cylindrical form for density in electrical and thermal experiments.

The set consists of one piece each of aluminum, brass, zinc, copper, iron and lead solid cylinders.

These cylinders are used in density and specific gravity measurement.

The ends are carefully turned and surfaces are smooth.

Indian Lab Suppliers Custom made sizes and materials also available including non metal materials like wood, plastic, etc.
