

Product Code . ILS-HSM-11094

DNA Structure Model, Plastic Assembly Kit

Description

Each base in the 12 base pair model is a subtly different shape, and the sugars are made from a slightly different plastic so the model flexes correctly to create a realistic double helix.

An easy-to-assemble DNA model, this stunning recreation consists of specially shaped, brilliantly-colored plastic pieces.

We can deconstruct the double helix into two separate strands by moving the central supporting spine and pulling the helix apart along the hydrogen bonds.

Size : 12x12x40cm
