

Product Code . ILS-HSM-11095

DNA Structure Model, Plastic Assembly Kit, Deluxe

Description

Each of the four nitrogenous bases comes in a different unlabeled color, so students can design their own pairing.

The unique plastic for allows you to assemble the model and then twist it into a double helix, instead of building it around a center post as in other models.

The model is removable from the plastic base and can be extended to its full length to demonstrate strand separation.
