

Product Code . ILS-CS-11415

Globe, Inflatable, diam.42cm,w/o Stand

Description

Technical Specifications:

Topographical globe, inflatable (without the use of a pump): showing continents, oceans, rivers, mountains, deserts, forests, et cetera, but without emphasis on political boundaries (printed in dotted lines). English language place names; continents and towns printed in black; country names in red.

Instructions for use:

To be inflated without the use of a pump as per the manufacturer's instructions. There are two plastic rings, one of each side of the inflating valve, which can be used for hanging the globe for practical demonstrations during geography lessons.

Material: PVC, glossy finish; Approximate thickness 0.19mm; able to survive rough treatment by the children. Inflating valve made of hard plastic, with two plastic loops for inserting rope/thread for hanging

Dimensions of globe:

Diameter: 42cm (inflated)

Circumference: approximately 132cm
