

Product Code . ILS-WT-11443

Arsenic Test Kit, Extended Range

Description

General description:

Portable, simple and rapid visual arsenic testing kit for drinking water. Kit is designed for field use.

Results are available in less than 20min, including sample preparation and necessary reaction time.

Kit has a detection range up to 500 ppb, with the following measuring range (colour scale graduation):

0-5-10-20-30-40-50-60-80-100-150-200-250-300-400-500 ppb As^{+3/+5}

Technical specification:

WARNING: Hydrogen gas and Arsine gas are generated during the reaction. Work in a well-ventilated area away from fire and other sources of ignition. All reagents are unsuitable for human consumption and must be kept away from children and pets.

Based on the Gutzeit method, the testing kit produces a coloured strip in order to detect and visually

measure soluble inorganic arsenic (As+3 and As+5).

The kit includes three (3) different powdered reagents with two (2) reaction vessels, colour chart bottle label and has enough test strips and reagent to conduct 100 tests. Kit comes in a sturdy plastic case.
