

Product Code . ILS-K-11661

Mini Projectile Launcher

Description

Set any required launch angle from 45° downwards to straight up with the protractor and plumb line.

Three different spring tensions give three repeatable launch speeds with ranges of 1m, 1.5m, and 2m.

The Mini Projectile Launcher projects steel balls at ranges suitable for use on the benchtop or from the bench to the floor.

A magnetic piston ensures that the ball does not touch the side of the barrel and launches straight every time.

The unit can be fixed to a bench with a clamp (not included) or can stand on its own.

Two 16mm steel balls included.

A cable release gives a smooth triggering to prevent jerking.

Features

Cable to release projectile

No sudden flipping on the apparatus

3 launch speed (ranges: 1m, 1.5m, and 2m)

Built-in protractor to easily determine angle of launch

Very Smooth: Spring only launching ball causing the motion

Sturdy metal base

Specifications:

Width: 15 cm

Release cable length: 28 cm

Length: 18.5 - 30.5 cm, depending on attachment point

Height: 11.5 - 25.5 cm, depending on angle adjusted

Steel ball diameter: 16 mm

Weight: 860g
