

Product Code . ILS-K-11678

Electronic Spark Timer

Description

The low-friction discharge needle, which barely touches the spark-sensitive 1 cm tape, makes it ideal for air tracks and free-fall experiments.

Built solid, this fully electronic spark timer provides two different spark timing rates of 10 or 60Hz. Measuring just 90mm x 97mm x 37mm, it lends itself perfectly to both bench-top and support-mounted experiments.

Includes a self-storing cord, bench clamp, and a free roll of spark tape.

Operates on standard line voltage of 110V AC 60Hz.

For clarity of measurement, the discharge needle (which is fully adjustable for greatest accuracy) leaves a double dot at each point.
