

Product Code . ILS-K-11679

Coin and Feather Demo

Description

The demo includes a metal disk, a feather and a transparent free fall tube.

The tube easily mounts on a ring stand with a clamp (not included) or can be held by a student.

Easy to set up and economically priced, our Coin and Feather Demo can be used to perform the classic experiment of a lighter object falling at the same rate as a heavier object when air resistance is removed from the equation.

The acrylic tube is 100cm long and 3.75cm in diameter and is equipped with an evacuating valve.

Any electric vacuum pump that reaches 24-27hg can be used.

We recommend our Electric vacuum pump to work with the Coin & Feather demo.
