

Product Code . ILS-WAE-11720

Magnetic Accelerator

Description

Using a double-sided ramp and a series of steel marbles, you initially demonstrate Newton's First Law by rolling one steel marble down the ramp to collide with a resting group of marbles.

A great introduction to the concept of magnetic potential energy.

Not so impressive so far.

Your students will be amazed as the collision shoots the last steel marble right off the ramp.

While setting up to repeat the demo, replace the first resting steel marble with a magnetic sphere.
