

Product Code . ILS-WMP-11736

Mini Ripple Tank

Description

This Mini Ripple Tank addresses these issues by providing a completely self-contained device, requiring no set-up apart from the addition of water.

Indian Lab Suppliers Ripple tank wave generators are such a wonderful way to demonstrate the wave phenomena of reflection, refraction, diffraction and interference, but they can be time consuming to set up and take down.

Illumination is from a high intensity built-in LED which can automatically set the strobe frequency to be in sync with the waves to give perfectly stationary images, or switched to allow the user independent control of the wave and strobe frequencies giving the impression of wave motion across the viewing screen.

Strobe Frequency Range 30 – 500Hz nominal

Input Voltage: Regulated 12V DC +pin

Current Requirement: 400mA

Weight: 1.07kg

Dimensions: L x W x H: 9 x 7 x 5.5
