## Piezo Buzzer in Vacuum Chamber

### Description

When the unit is connected to a vacuum pump, the air can be removed, and the effect of sound being unable to pass through a vacuum clearly demonstrated.

Our Piezo Buzzer in Vacuum Chamber is the modern replacement for the Bell Jar & Ringer.

The apparatus features a piezo buzzer enclosed within a clear acrylic tube suspended between two posts limiting the transfer of sound, and is controlled by a switch that has a red LED attached to show that it is on.

An effective demonstration with none of the complications of the traditional apparatus.

Sound returns when the air is allowed back into the chamber.
