

Product Code . ILS-SAR-11743

Bell Jar and Ringer

Description

The bell is mounted on springs to dampen the vibrations, so students can clearly hear the drastic reduction in sound when the air is removed.

Showing that sound requires a medium to travel through requires specific equipment, and it's the only way to really demonstrate the concept.

8.5" diameter, 11.5" tall, and requires 2 AA batteries.

Electric vacuum pump not included.
