

Product Code . ILS-EAC-11804

Complete Superconductivity Kit

Description

The disc has a critical temperature of 92 degrees Kelvin.

Our superconductivity kit features a large superconductive disc formulated from the oxides of Yttrium, Barium, and Copper in the famous 1-2-3 chemical combination.

Chill the disc to 77 degrees Kelvin with liquid nitrogen and it produces a striking Effect (magnetic levitation) when the neodymium magnet is introduced.

Contact jLab for your Educational School Science Lab Equipments. We are best science educational equipments, science educational instruments, science lab equipments manufacturer, science laboratory instruments exporter, scientific educational equipments, scientific educational lab equipment in india.
