

**Product Code . ILS-EAM-11812**

## World's Simplest Motor

### Description

---

Current supplied by a D battery creates a magnetic field around the coil, causing the coil to push away from the ceramic magnet in the base and spin as long as current is present.

This easy-to-use kit is priced so you can give all your students a hands-on first step into technology.

Set-up is a snap.

By building and observing a motor that converts electrical energy into motion, students discover and explore first-hand several key properties of electricity and magnetism.
