

Product Code . ILS-E-11822

Fuel Cell Car Science Kit

Description

The reversible fuel cell splits water into oxygen and hydrogen.

The hydrogen is then used to power the fuel cell car. Plus, the car drives itself.

This Fuel Cell Car Science Kit lets students explore the ideas behind the full-sized fuel cell cars currently being introduced around the world.

It's capable of avoiding obstacles on its own. Serious science and serious fun in one science kit.

Includes solar panel for powering electrolysis, and complete experiment guide on CD.

Clearly demonstrates the science behind electrolysis and splitting water into oxygen and hydrogen.

Includes a solar panel for powering electrolysis, and a complete aligned experiment guide on CD.
